

## Press Release

0206-01e 07 June 2002

### **1N4148 series again available**

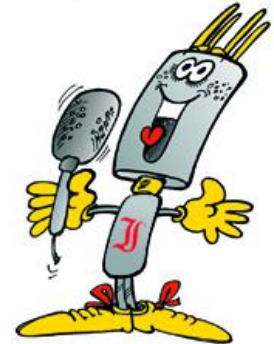

*The probably best known diode at all*

With new databook Edition 17 Diotec (Germany) is offering again small signal diodes in DO-35 glass package. Beside the 1N4148 these are the 1N4448, the 1N4150 as well as the 1N4151. Featuring 150 mA and 100 V the 1N4148 is a universal small signal diode, which must be common to nearly every electronics designer.

*High resolution picture  
on request*

Also available is a "Lead Less" version in surface mountable glass MiniMELF (SOD-80) package. These SMD devices are called accordingly LL4148, LL4448, LL4150 und LL4151.

---

**Diotec Semiconductor GmbH** located in Heitersheim/Germany produces and sells semiconductors like diodes, rectifiers, diacs and transistors with more than 25 years experience. **Further informations** are available from Udo Steinebrunner, Tel.: +49-7634-5266-83, Fax: +49-7634-5266-61, Email: [u.steinebrunner@diotec.com](mailto:u.steinebrunner@diotec.com) or on our website <http://www.diotec.com/>.
